Laws For Awakening Humanity

Simon Bialobroda © 2023

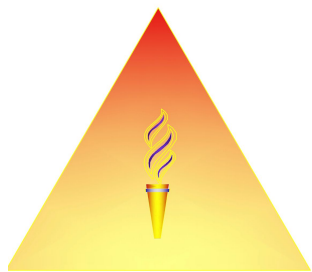

The author believes:

- What is important is the consciousness we create as a group and individually within ourselves.
- Excellent educational tools are those that promote discovery, creativity, imagination, cooperation and empathy.
- Expressing the best of human qualities and spreading them in the world drives us to evolve and improve.
- Teachings of enlightenment are never complete. They are a particular reflection in time and space of the Universal.
- Enlightenment teachings have value if they show the way to the experience of the truth of Being and Reality and are embodied.
- Consciousness wisely focussed towards constructive achievement brings balance and love into the world.

GROUP ACTIVITY IN THE NEW ERA

Not only must man fulfill in love his family and national obligations, but he must think in the wider terms of humanity itself, and so bring the concept of divine relationship into expression. Divine relationship is a newly emerging group or soul quality. Questions such as "Will my action tend to the group good? Will the group suffer or hurt if I do this action?" are a reflection of this quality. Abiding by these actions will gradually become part of our humanity's consciousness and our civilization will adjust itself to these new conditions. All aspects of the life of God are interdependent, and when one proceeds *consciously* to fuller expression, all benefit.

To teach by embodying the teaching is living by example and the key to group life, activity and progress. Group Activity refers to groups functioning with soul consciousness and not with self-interest. In the Aquarian age, higher purpose infused with the energies of the Fifth kingdom expressing intelligently with love by the human kingdom will be the hallmark of group activity. It will require a person realizing he/she is a vital part of the chain of planetary life and a willingness to align with higher law. The activity which flows from soul identified consciousness will naturally create a refusal to contact any energy deemed inimical to the group life. Out of soul contact, the willingness to assume responsibility for the working out of the Plan is also natural.

The inner Teachers train disciples to serve the plan with freedom, for in freedom, the sense of joy which comes from inner cooperative love is the best work done. The willingness to sacrifice the lesser when the greater is sensed is that for

which They search. The spontaneous relinquishing of long-held ideals when a greater inclusiveness presents itself is Their guide. The sacrifice of pride and the sacrifice of personality when the vastness of the work and the urgency of the need are realized, evokes Their cooperation.

The great need in the first decan of Aquarius will be recognition of the spiritual hierarchy and then conscious cooperation of groups from the fourth kingdom. As Saturn rules the first decan, group activity will be stimulated by the Saturnian qualities of discipline and responsibility while Love of the Fifth kingdom will continue to irradiate the consciousness of humanity in the new era. Those who understand the beauty of collaboration with the subtle worlds, also understand reciprocal approach, refinement and unification of consciousness, not a small task. But, in true collaboration is great joy, power and success.

The 'Law of Love' is the truth of right relationship, of loving understanding and actively expressed Love. It is the foundation of brotherhood and the expression of an inner unity. The higher laws and laws of soul Life when applied will bring about the unity of the human and spiritual kingdoms — wills completely aligned with the purpose of the Planetary Lord: to establish the Law of Love on Earth. Love is the source, Love is the motivating energy and Love is the goal, and when the fiery Love of the Fifth Kingdom married with the Will of Shamballa and intelligently carried out by the Fourth kingdom, the Christ consciousness of 'Life More Abundant' will awaken and manifest throughout the planet.

All those who are pioneers of the new age will need to understand what being a new human means and the changes it requires in consciousness, attitudes and behavior toward one other. The unfolding new era will be one of Freedom in which groups and centers of energy will be emerging in greater numbers. It must be remembered that the new energies of Love, Light and Truth cannot abide where law is broken or in old wineskins. Therefore, the mandate from the Planetary Logos is "all who would be of the New Age cannot break laws...I tell you, now you cannot do this and remain in the presence of these New Age energies. " -Revelation, Birth of a New Age, Second Printing, 1977, p. 67.

Two thousand years ago, Jesus, an embodiment of divine love and wisdom did not break law but acted according to the dictates of love and truth, and love cannot harm any man. In addition, the first principle of love affirms the needs and rights of others. Such is the nature of the new era with its new attunements and laws, none of which are in opposition to freedom or harmful to life, but exist for the glorification of what man in his heart of hearts has always sought to do. It must also be remembered that Love never, never places itself superior to any man or any condition. It doesn't have to, for it knows that it can work within any condition and transmute it utterly and create perfect results.

As the consciousness of humanity reaches higher levels through awakened group activity, potent new energies will be made available for the building of the new earth in the new era. This will lead to new forms and expressions exemplifying the presence of new energies and its laws.

THE PERECT EXPRESSION — "ENERGY FOLLOWS THOUGHT"

"Energy follows thought" is an ancient truism. "When a form and an activity is what you call evil, it is only so because the motivating energy behind the form and responsible for the activity is wrongly oriented, selfishly impulsed and incorrectly used. There are others which will be imparted when this and others associated with it is mastered and rightly applied." - Bailey, Alice A. *Destiny of Nations* p. 128. The focus here is on 'energy follows thought', To better understand the power of thought, its relationship with law and its application is the following from *Life and Teachings of the Masters of the Far East, Vol. I*, by Baird T. Spalding:

"In the evening, after we had assembled, Emil, without opening the door, suddenly appeared in our midst and said, "You have seen me appear in this room, as you would say, by magic. Let me say there is no magic about it. Here is a simple experiment which you can behold. You can see this, consequently you will believe. Kindly gather around so that you can see. We have a small glass of water which one of your number has just brought from the spring. You see that a minute particle of ice is forming in the very center of the water. You see it gather to itself, particle by particle, more ice, until now the whole of the water in the glass is frozen. What has happened? I held the central atoms of the water in the Universal until they became formed or, in other words, I lowered their vibrations until they became ice and all the other particles formed around them until the whole has

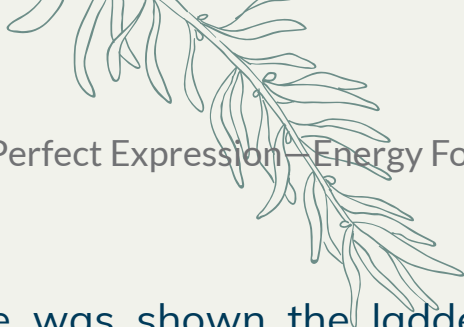

become ice. You can apply this to the little glass, the tub, the pond, the lake, the sea, the whole mass of the water of the earth. What would happen? All would be frozen, would it not? To what purpose? None. You ask by what authority. I say by using a perfect law. But in this case, to what end? Nothing, as no good has been accomplished or could be accomplished. Had I gone on determined to carry this out fully, what would have happened? The reaction. To whom? To me. I know the law and what I express returns to me as truly as I express it. Therefore, I express only the good and the good returns to me only as good. You can readily see that, had I persisted in the freezing, the cold would have reacted upon me long before I had accomplished the end and I would, in reaping the harvest of my desire, have been frozen. Whereas, if I express the good, I reap the harvest of my good eternally.

God fills both heaven and earth. It was this great revelation that came to Jacob in the silence. He had slept on the stone of materiality. In a great burst of divine illumination he saw the outer [earth] is but the out-pressing or expression of the image held within [heaven]. So impressed was he by this that he called out, 'Surely the Lord (or law) is in this place (the earth or body) and I knew it not. This is none other but the house of God and this is the gate to heaven.' Man will realize, as Jacob did, that the real gate to heaven is through his own consciousness. It is this ladder' of consciousness, revealed in a vision to Jacob, which each of us must climb before we can enter that silent secret place of the Most High and find that we are in the very center of every created thing, one with all things visible and invisible, in and of the Omnipresence.

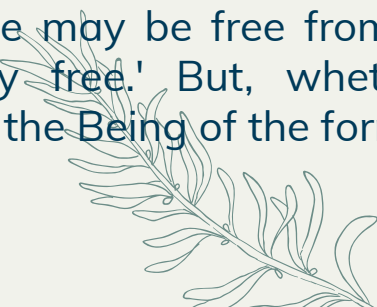

In Jacob's vision he was shown the ladder reaching from earth to heaven. He saw the angels of God descending and ascending upon it—God's ideas descending from Spirit to form and ascending again. It was the same revelation that came to Jesus when the heavens were opened unto him' and he saw the wonderful law of expression whereby ideas conceived in the divine Mind come forth into expression and manifest as form.

So perfectly was this law of expression revealed to the Master that at once he saw all form may be transformed, or changed in form, through a change of consciousness in regard to it. His first temptation was to change the form of stones to that of bread to satisfy personal hunger, but with the revelation of this law of expression came the true understanding that stones as well as all other visible forms have come forth from the Universal Mind Substance, God, and are in themselves true expressions of divine Mind; and all things desired, (not formed) are still in this Universal Mind Substance ready to be created or brought forth to fill every desire. Thus, the need for bread but showed that the substance with which to create bread or any other needed thing is at hand without limitation and bread can be created from this substance just as well as stones can be created therefrom.

Every good desire man has is God's desire; therefore, there is an unlimited supply in the Universal God Substance all about us to fill every desire. All we need do is to learn to use what God has already created for us and this He wills to have us do that we may be free from every limitation and thus be 'abundantly free.' But, whether the form be perfect or imperfect, the Being of the form is perfect God-power,

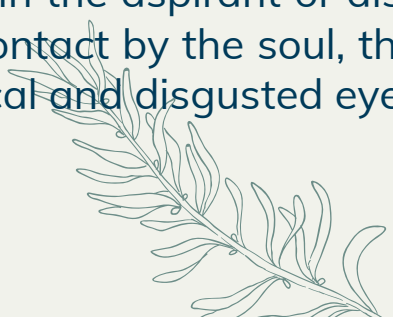

substance, and intelligence. It is not the Being of the form that we wish to change but the form that Being has assumed. This is to be done through the renewing of the mind, or through the change from the imperfect to the perfect concept, from the thought of man to the thought of God. How important then to find God, to contact Him, to be One with Him and to bring Him forth into expression.

How equally important is the silence or the stilling of the personal mind, that the God-mind in all its splendor may illumine the consciousness. When it does, then we shall understand how 'the sun of righteousness (right-use-ness) shall rise with healing in his wings.' The mind of God floods consciousness as sunshine floods a darkened room. The infusion of the Universal Mind into the personal mind is like the entrance of the vastness of the outside air into the impurity of that which has long been held in some close compartment. It stands alone, supreme, and we realize that we are to build but one temple. The Temple of the Living God is the blending of the greater with the lesser through which the lesser becomes one with the greater." Here we clearly see the inspiring potential of this mind principle awaiting humanity in the distant future."

The following is an example to be aware of regarding the "energy follows thought" mind principle that can happen even to a aspirant or disciple who has had a touch of soul contact, senses the vision and possibilities: "Energy, we know, follows thought and is tintured by the quality of that thought. In the aspirant or disciple who has had a touch of soul contact by the soul, there is sometimes a tendency to turn critical and disgusted eye upon his personality and in so

doing feeds the very things which he deplores and thus renders himself still more inadequate to the task. It is a vicious circle of effort and must be offset by a complete realization of the truth contained in the words: "As a man thinketh, so is he." As he dwells upon the nature of his omniscient soul, he becomes like that soul. His thought is focussed in the soul consciousness and he becomes that soul in manifestation through the medium of the personality." -*A Treatise on White Magic*, Alice A. Bailey, p. 306. Here we can clearly see in a practical way that what we focus our attention on, where we place our identification determines the form and its characteristics. Form follows consciousness is an evolutionary truism connected to this formula. Freedom of choice is always honored by the universe. If there is any judgement in this divine universe, it can only be by how much we love.

In every age the Great Teachers have stressed the power of thought and that when one's thought is connected to inner feeling of the heart, which in truth is thought identified with the consciousness of the soul, then one truly thinks. All of creation was created from thought, but to minds that are made up, which reject such a notion, the power of thought remains unrevealed and its laws ignored.

“INDEED, THE TIME WILL COME
WHEN MANKIND WILL FINALLY
REALIZE THE POWER OF THOUGHT.”

THE GREAT ILLUSION

What is the Great Illusion and how is it related to the Laws?

"I wish to emphasize my personal belief in the powers of these Masters and in their demonstration of a great Law—a Law that must carry a profound message to the whole human race. They proved conclusively that there is a Law that transcends death and that all humanity in its evolution is slowly moving forward to understand and use it. The Masters say this Law will be brought forth in America, will be given to the world, and then all may know the way to Eternal Life. This, they acclaim, is the unfoldment of the New Age. There is a God Law and human beings will soon inherit it, become illumined, and use the body with understanding in full Masterhood." -Baird T. Spalding, author of *Life and Teaching of the Masters of the Far East*, vol. I, p.157.

Death is the great illusion of humanity. How is it transcended? Only by recognizing the fact of the Soul—the factual reality of the individual immortal soul, which is the mother of all humanity's solutions. The Master's of Wisdom, the Elder Brethren of the Christ, also once sons/daughters of men and now Sons/Daughters of God know this to be true. This recognition spoken of is essential to the transformation of the U.S., its potential influence upon the world and survival of the human species. In the new era, the fear of death will give place to the understanding that death is in truth the continuation of Life, the true Self on higher planes of existence. Only the form aspect of life ends after it has served the purpose of the indwelling consciousness for a

particular cycle of manifestation. The notion that with death, life ends is a mental obscuration created by form identified thinking. The true nature of Life is eternal, full and free, realized through the qualities of conscious knowledge and the fruit of all experience the soul in form acquires as it evolves. Why would the Creator make death into total destruction? The new incoming age will finally release humanity from the fear of death and show it as the joyful and sacred event that it in actuality is.

"The consciousness of the new Earth is rooted in Life and fulfilling its higher potentials. Everything will change when it is understood that Life is Spirit—inextinguishable and unceasing. The future of humankind rests upon the realization that spirit infuses all living forms. Spirit is the creative force behind the whole of existence. Try to imagine being alive without the fear of death, and in its place the realization that when the form is outgrown the wearer will give it up for a period of rest before another form is taken on. There will be an underlying awareness permeating the human experience that the purpose of life is to enlighten Life in all its forms. Death will have an entirely different meaning as the purpose of life is perceived in the context of the soul's journey toward perfection." -Cosmic Whisperings

Consciousness evolves on planes of Spirit with wondrous laws for its evolution. The Laws of the Soul are the next laws of life to which humanity can respond, and these—when fulfilled—will conclude an intention of the God of our planet in relation to the divine purpose of our Solar Logos. The spread of Christ consciousness within humanity, forging the immortality of the divine self and that Spirit infuses all forms with love coupled with the acceptance of responsibility for working out the divine plan of evolution, will make it so.

LIVING ETHICS

As you may have surmised, this is a book not only about the laws of life but about preparing to be citizens of the new earth. The new era which is imminent, will be about soul-centered living ethics and the synthesis of the best of all past religious traditions, spiritual paths and philosophical doctrines into the mergence of a new teaching formulated by the World Teacher infused with the livingness of Shamballa, the center where the Will of God is known.

Some call this the new teaching of life, Agni Yoga or Living Ethics which was first introduced by Helena Roerich in the last century to prepare humanity for the new era. Living Ethics, the yoga for the Age of Light is a yoga of knowing and living as a soul. It will continue in the new era, part of the World Teacher' new teachings of love and truth that will give rise to culture and civilization of Light.

The basic principles of Living Ethics are: carrying within one's heart the fiery energy of love or love infused with higher purpose, alignment with the consciousness of the soul, of responsible, directed loving thought and the realization that the evolution of the planetary consciousness is a pressing necessity.

The principle that consciousness evolves is an inherent part of soul-centered living ethics and the fact that planetary consciousness, a planet united in wholeness is an attainable aspiration for all of humankind. The higher laws associated with new age energies asks us not to judge in the sense of creating conflict nor to set ourselves up as against the old

because one of the characteristics of consciousness in the new era is that of non-separation or inseparability.

Consciousness in the new era is based on the state of oneness - inseparability. We are being called to reflect and manifest this consciousness in our lives, to be each moment, the new human in the here and now. Separative thinking or energies, a characteristic of the world age that is ending has no place in the new era.

Through planned cooperation between humanity and the spiritual realms or fiery worlds, with love and living wisdom — peace, a true peace, in which there are no longer any obstacles to the Good, True and Beautiful is achievable.

Soul-centered living ethics asserts the vision of the emerging new world and the necessity for co-measurement to sustain the vision. Living Ethics is the foundation upon which the new earth will be built, the new earth being the materialization of a higher reality on Earth.

Even though that which manifests in the new earth on the etheric-physical plane will be imperfect as compared with the Source from which its blueprint emanates, yet the universal concept: "As Above, So Below" holds true. What exists below is a replica of what flows from "On High"—from within the Mind of God—though it be of lesser magnitude in its unfoldment. The sentence "as above, so below" is a truism, in that the higher energies "above" are constantly having a developing effect on the lower energies, "below",

in nature, humanity and the cosmos. The application of soul centered living ethics is based on this universal fact.

AGNI YOGA

Nicholas Roerich, 1928.

"The evolutionary goal for humanity is to enter into conscious relationship with, and ultimately to merge with, the Kingdom of Souls. Out of this living relationship will evolve the fundamental adjustments in human consciousness needed to realize the Divine Plan for the new Earth. The new era will see the flowering of Christ consciousness—the qualities of the divine soul aware of its true nature. Humanity will recognize the reality of the soul as the consciousness within the form."

(Entering the Age of Light/Cosmic Whisperings).

THE COMING WORLD TEACHER AND SIRIUS

What will nurture of the full flowering of the soul will be the proximity of humanity to the presence of the World Teacher, the Christ, the eldest brother of humanity and His Companions. This He can do because of his development. Christ was the first within humanity to have embodied the divine quality of Love-Wisdom plus identification with the highest aspect of divinity called the Will of God. It enabled Him to live the life of "Limitless Love and Truth", a term used in the book *Revelation, Birth of a New Age*, p.44, 1971 ed., by David Spangler. Limitless Love and Truth is a power present within each person for transforming the world and bringing a New Age into being.

The major linking energy in the solar system is the energy of Love-Wisdom. Love relates the Hierarchy to Humanity, and Wisdom relates the Hierarchy to Shamballa. Only when Humanity and the Hierarchy are working together in a practical synthesis, can the Shamballa energy be permitted complete inflow through the medium of humanity into the three lower kingdoms.

Christ's main task is "*to establish relationships,*" which falls into three categories. The following from

Rays and Initiations, pp. 89-94, Alice A Bailey:

I: His major task as Head of the Hierarchy is to evoke the electric fire of Shamballa, the energy of the divine Will, and this in such a form that the Hierarchy can be drawn nearer to the source of Life, and Humanity can consequently profit by this hierarchical Approach and know eventually the meaning of the words "life more abundantly. This is also one of Christ's immediate tasks.

II: The work here concerns His activity as Initiator and His responsibility as Head of the Hierarchy. He nourishes the little lives of human souls referring primarily to His task as World Teacher, to nurture the awakening soul into full flowering and His responsibility to lead humanity on into the light, with the aid of all the Masters, working, each of Them through His Own Ashram. This is also one of Christ's immediate tasks

III: His work as the Word of God, which manifests as the Word made flesh. This refers specifically to the great Wheel of Rebirth whereby, upon that turning wheel, souls are carried down into incarnation and then up and out of the soul's prison; through the turning of the wheel and mainly the Law of Karma, human beings learn their needed lessons, create cyclically their vehicles of expression (the response

and aided by the Hierarchy and schools of instruction, they arrive at perfection. This entire process is under the control of the Christ, assisted by the Manu and the Lord of Civilization. This one is constant.

It is Christ's task to further the approach of Hierarchy to Humanity, relating both to each other, to relate both Hierarchy and Humanity to Shamballa and eventually to relate all three to each other. In the new era, "relationship" will be greatly facilitated due to the earth's existence in the etheric frequency of light and Teachers, with a profound understanding of new age energies and laws. What is little known but coming forth is "not only is the Christ the Emanator of love but also is one of the Transcendent Mediators between the Brotherhood of Sirius and Earth. Sirius has served as a beacon for love and truth in this galaxy for millions of years and represents an unwavering commitment to the spiritual evolution of our planet. *Sirius** will hold a focus of importance, as it always has done, in the future." -Master A (Letters)

As is stated by the Tibetan Master DK in Rays and Initiation, it is now possible to present Christ's true and wider task. Christ has added to His two immediate and constant tasks, that of hastening the

apparatus of the soul in the three worlds) and in this way, under soul guidance, and aided by the coming of the Avatar Who waits for the perfected work of the Hierarchy, focussed in the Christ, and the powerful work of Shamballa, focussed in the Lord of the World. When the exact moment has arrived, the work of the Buddha, representing Shamballa, and of the Christ, representing the Hierarchy, plus the sincere demand of Humanity, will bring about an arrangement or an alignment which will release an evocative Sound which will be extra-planetary, and then the Avatar will come.

When the Avatar has made His appearance, then will the "Sons of men who are now the Sons of God withdraw Their faces from the shining light and radiate that light upon the sons of men who know not yet they are the Sons of God. Then shall the Coming One appear, His footsteps hastened through the valley of the shadow by the One of awful power Who stands upon the mountain top, breathing out love eternal, light supernal and peaceful silent Will. Then will the sons of men respond. Then will a newer light shine forth into the dismal weary vale of earth. Then will new life course through the veins of men, and then will their vision compass all the ways of what may be. So peace will come again on earth, but a peace unlike aught known before." -The Reappearance of the Christ, Bailey, Alice A, p.14.

The keynote of Christ's mission will be to evoke from humanity a response to the influence of the extra-planetary Avatar, and an unfoldment on a large scale of intuitive perception. When He came before, He evoked from humanity a gradual response to truth, and mental understanding. That is why at the end of the Piscean cycle, which He inaugurated, the Plan of mental development was formulated.

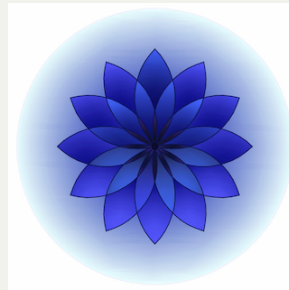

The work being done by Shamballa and Hierarchy, on behalf of humanity is towards development of group consciousness and the formation of many groups which will be living organisms of soul life and not organizations of personalities.

The presence of Christ and His Companions along with the advent of Preparatory Schools of Meditation and later advanced schools, combined with Ray Temples at specific planetary centers throughout the world will make group initiation on a wide scale possible for humanity. This will enable certain aspects of the will to flower forth correctly and with safety. The divine spirit, the monad only knows the livingness of Life and the state of unalterable Being. Spirit simply IS. Within these words lies a great mystery regarding Shamballa and the Will, and also in the word 'resurrection'. This will be one of the new

teachings for humanity which will express as the livingness and beingness of Life or the livingness of the Christ nature. Inevitably, the true and better understanding of this will come in the new era.

(For additional information on the World Teacher's role and mission in the new era, see "The Coming One", www.thecominone.org, Articles 1-8

Sirius C Symbol

* *"Sirius C is quickly becoming known as the 'blue star' in your scientific circles. This is no coincidence that it is being called the 'blue star' because the star system emits an electric blue hue with a dark indigo center. The reason for this is because it is a sacred galactic portal to our second ray solar system, and indigo blue is the esoteric color of the second ray. This color holds a profound occult significance that is related to the mysteries of the wisdom in which the seventh ray will reveal in the new age. This color is also related to the new world religion." -Master A (Letters)*

ABOUT THE AUTHOR

Simon Bialobroda has been a life-long student of eastern and western wisdom traditions and author of the book: '*Livingness In Form*'. As a semi-retired architect, he lives in the Rocky Mountains of Colorado with his wife Linda Myers, working on projects that are preparing humanity for entering the new era.

"INDEED, ONLY THE BROADENED CONSCIOUSNESS PERMITS US, IN SPITE OF ALL THE HORRORS THAT TAKE PLACE, IN SPITE OF THE TRAMPLING OF THE MOST SACRED CONCEPTS AND FOUNDATIONS OF HUMAN DIGNITY, TO PRESERVE COMPASSION AND LOVE FOR HUMANITY IN THE HEART."

Urusvati
(Agni Yoga,
Letters II, 1938)
